FAIL SAFE & TROUBLSHOOTING

Follow these tips!

1

Put keys that come with safe in a secret spot you will remember as this opens the safe it the battery or keypad fails

Press the button found under the keypad and twist anti-clockwise to reveal a key slot

Spare or replacement keys can be ordered by contacting info@blackouttactical.com.au and referencing the code behind the battery

2

Low voltage or Battery issue:
When unlocking your safe by keypad or fingerprint, the module displays red and unlocking identifer displays a green light. This indicates that the battery is insufficient.

Replace at your earliest convenience.
