

1

Install Battery

Under the code there is a latch, push and twist. This will expose the battery compartment to insert a battery to power the lock

BLACKOUT

NEW PRO SERIES SAFES SETUP

2

Open Safe Door

Enter factory code "159#"
 Green light will show
 allowing you to open safe

3

Reset Button

Locate reset button "RED"
 and press once. A beep
 sound will prompt.

IMPORTANT:

Before closing the safe
 we recommend you test the code to
 ensure the code was saved
 successfully.

NOTE:

Replacement keys can be organised by
 contacting

info@blackouttactical.com.au

Please send a photo of the back of your
 code as this contains your locking ID.

Helpful Tip:

*We recommend using good quality 9V
 batteries to ensure long lasting use*

4

Change Code

Enter your desired code, then
 press * then re-enter code
 followed by #.

Example:

1234* (listen for beep) 1234#. This
 will confirm the new code.

Note: you can have up to a 6 digit code
